- Highlight: **Polished 304 Stainless Steel Sheet Metal,
8mm 304 Stainless Steel Sheet Metal,
321 0.3 mm stainless steel sheet**

Product Description

Polished Available 304 Stainless Steel Plates Sheets For B2B 2B 8K Surface 0.1-8mm Thickness Cold-Rolled Sheets Plates

This grade is a lower-cost alternative to 304 stainless steel. The savings are achieved by increasing its carbon content and decreasing the chromium and nickel content. The trade-off is that this lower-cost version is less resistant to corrosion when compared to the other stainless steels for sheet metal fabrication. Its applications are numerous and can include structural components for trains or appliance enclosures.
